With over 400,000 square feet of warehouse space in 5 locations, the Hollander Group offers the largest selection of specialty glass in the world.

Pictured above is our 130,000 square feet Houston Texas facility again raising the bar in our industry for what a glass supplier should be!

We invite you to visit any of our five facilities and experience for yourself, the pleasure and convenience of partnering with the industry leader for our mutual success.

The World's Leading Supplier to the Stained Glass Trade

Houston • Chicago • New York
Phoenix • Atlanta

BUSINESS TERMS & CONDITIONS

Sales Hours:

Monday thru Friday: 7:30am to 4:30pm Central

Warehouse Pickups: 8:00am to 4:00pm

We are closed for the following Holidays:

New Years Day - Memorial Day - Independence Day - Labor Day - Thanksgiving (Thurs. & Friday) - Christmas Day

Welcome to The Hollander Glass wholesale catalog. Our selling policy is strictly wholesale to the trade only. That means we are a business that sells only to other businesses in our related field. This brings up an interesting (if not difficult) question. What is a business? Webster's dictionary defines a business as "employment; profession; vocation; any occupation for a livelihood." We agree with that definition and that is what you must be in order to purchase from us. You must be actively involved in selling your work (or re-selling product) to the general public through some sort of commercial venue, with the primary motive of profit (livelihood) at its core. Sounds like a business doesn't it? We firmly adhere to this policy because we can only succeed if you do; and you cannot prosper if your retail customers are buying wholesale. We greatly value our customers, so please understand and respect our diligence on this issue. In return, you may be confident that you will not meet your customers at Hollander! It is your responsibility to prove to us that you are a business, below is a list of some things we require to help us define and understand your business. Regardless of any or all of the qualifying conditions being met, we reserve the right to make the final decision regarding the establishment of a wholesale account.

How to Qualify

- You must be involved in the "glass trade" in some way. We will provide you with one of our "business profile" forms which must be fully completed and signed by the business owner(s).
- A state resale tax permit and a city / county business license (if available) registered to the company name on the above form along with a signed "tax exemption certificate".
- Any other evidence you can provide indicating your involvement in a professional business. For example, business card, letterhead, business phone listing and/or yellow pages ad, business checks, sales receipts or invoices indicating resale of product, a copy of your state sales tax return form showing evidence of sales. You get the idea. Any or all of these things will help.

How to Order

In Person — 5455 Guhn Road, Houston, TX 77040

Hand-pick your own order from our "supermarket style" shopping center. This is still the only way to get exactly the right piece of glass for your discriminating eye, plus it's a great way to see all the new products available. If your in a hurry, call or fax your order a day or two ahead and we will have it ready in our "will-call" area.

By Phone — (713) 460-0045 or toll free

(800) 421-0449 — Call us with your order any time between 7:30 am & 4:30 pm Monday through Friday and a friendly Hollander staff member will take your order and help any way they can.

By Fax — (713) 462-3646 — It eliminates "verbal order mistakes" and you have a copy of your order and time sent to hold us accountable. Plus you can send it anytime night or day.

By E-mail — texas@hollanderglass.com — The most efficient way to order 24 hours a day and still retain an exact copy of your order.

Money Matters

- All first time orders for glass and supplies must be a minimum of \$600.00 and must be pre-paid or paid for at time of pick-up. We will not automatically waive our minimum even with proof of purchase from another “wholesaler”.
- All glass and supply orders thereafter must be a minimum of \$75.00.
- Orders which do not include glass or are will-call orders for customers with an open account, are minimum \$75.00.
- The only exception to the above minimum is for glass sent via U.P.S. (see “How to get your order”).
- You must purchase at least \$1000 per year to remain an active customer and failure to maintain this level will necessitate re-application prior to making future purchases.
- We will set up a “Net 30 days” open charge account for you, if you qualify. You must fill out, sign and return one of our “H.G. Credit Applications” and allow 4 to 6 weeks for processing. We will send you an application on your request.
- Interest will be charged on open accounts with any balances past 30 days at a rate of 1 1/2% per month (18% APR).
- We accept cash, check or major credit cards as payment.
- We are understanding and friendly, but you can expect a \$30.00 service charge for all returned checks.
- All orders to be shipped outside of the U.S. must be prepaid in full, before we will ship.

Visiting Hollander Glass/ How to get your Order

Will Call-Pick up

Our location offers a great selection of glass materials in a self-service atmosphere. Be prepared to pull your order and make sure you are dressed with safety in mind:

Warehouse Policy

1. WEAR Safety Glasses.
2. WEAR Gloves.
3. WEAR Long Pants.
4. WEAR Sturdy Footwear (NO OPEN TOE SHOES).
5. Accompanying children must be AT LEAST 15 years of age and cannot be left unattended AT ANY TIME.
6. No one (no exceptions) is allowed in our warehouse unless they are employees, principles, or immediate family members of our approved customers.

You can pick-up your order any time during our business hours or send someone to pick it up (you must call us to let us know who you are authorizing to pick-up for you). If you choose to visit us you may provide us with a list of materials to select and hold for your arrival, and you can hand select the rest of your order on site. Orders should be placed at least one full working day ahead (some orders may require more time). If you would like, one of our warehouse hands will assist you in loading, however if the glass is not packed in a crate, it is your responsibility to place the glass and secure the load in your vehicle. We strongly recommend a glass rack or glass frame be used to properly stack the glass on edge in your vehicle. We do not recommend “flat packing” glass under any circumstances. Loading and unloading glass this way is extremely dangerous and a safety risk to both you and our staff.

We ask you to follow the following safety regulations while in our warehouse. If you plan to take your selections with you, please make sure your vehicle is outfitted to transport your glass safely. Loading your vehicle is YOUR responsibility. We can pack glass in crates, for a fee, for your personal transport, but keep in mind these crates won't fit in most passenger cars.

Anything you select can also be shipped to you via the following:

- Local Delivery — We have made arrangements with a local delivery service to pick-up and deliver your order, usually the same day, for a very reasonable rate. If you are inside the city or in the immediate surrounding area, this service may be a viable alternative for you. Call us for details and rates. Crating charges for glass will apply.
- Motor Freight — We will ship by the carrier we consider “best” unless you make a specific request. We have set up substantial discounts with several freight companies which serve many areas. Let us help you save some money on freight!
- U.P.S. - Non glass — This popular and efficient parcel service can’t be beat for tool and supply orders. Generally, UPS orders we receive before 12 noon are sent the same day (except glass orders). To be fair all orders are processed first in – first out, so phone early for best service. Faxed orders are processed immediately.
- U.P.S.- Glass — Sending sheet glass via UPS is risky at best. In an attempt to cut down the risk of damage we have developed a special box and packing method which (so far at least) has been very successful. Even with this success we still must caution you to use this service with restraint and only if you “must have” the glass. We will pack it to the best of our abilities but we cannot assume any responsibility for damage during shipment. There is a \$30.00 charge for the special box, plus all glass shipped via UPS will be invoiced at 30% over our single sheet price.

Damages — Claims — Returns

We are not liable for damage or loss of merchandise once it has been placed on board the truck and the driver signs for it. The merchandise literally becomes the property and responsibility of the carrier.

When the shipment arrives, carefully inspect it for any signs of damage. If you suspect anything may be wrong, write your observations on the shippers receipt along with “subject to further inspection”. You may find some carriers will not accept this. If you suspect damage, you have no choice but to open the package right then and list the actual damage on the receipt. File a claim immediately with the carrier and notify us. We will help any way we can.

If a shipment is late or you want an E.T.A., call us and we will put a trace on it for you.

If wrong or defective merchandise is received through an error on our part, we will accept shipping costs both ways. However, you must contact us first to get a return authorization. Anything returned, for any other reason, will be subject to a 15% restocking charge. The resocking charge will also apply to all orders that are packed and subsequently cancelled by the customer. Sorry, but we cannot accept returns for any reason if you do not let us know within 30 days of your invoice date.

Shipping, Crating and Pallet Charges

- All freight charges are paid by the customer. Most orders are shipped “charges collect” except UPS which is added to your invoice.
 - There is a \$40.00 per crate charge on all “re-pack” glass orders. The charge is the same no matter how many (or few) glass sheets are in the box. We have crates that can hold up to 50 sheets. However, if you have to “man-handle” the case off the truck let us know the maximum weight per case you prefer. Larger sheets are subject to custom crating charges of up to \$150.00 and “Built Up” cases are \$40.00.
 - There is no crating charge for full unopened factory cases.
 - Glass crates must be secured to a wooden pallet to prevent damage and make loading and unloading easier.
- We charge you \$10.00 per standard pallet and \$50 to \$75 for custom pallets. A standard pallet can hold up to 2 glass crates.
- Lead requires a skid (\$10) to ship safely.

DISCOUNTS & PRICING POLICY

We Value and Reward Loyal Customers

We know we may not be the only stained glass wholesale supplier you purchase from. We would not question the prudence of your having a secondary supplier, but we also know that you must have a main source for the bulk of your ordering. This helps keep the cost of shipping down, promotes more “good will” for preferred service and gives you the buying power required to be competitive.

In business, nothing speaks louder than the bottom line!

We reward our loyal customers with the Hollander Frequent Buyer Program where your consistent patronage and volume buying is rewarded with increasingly better pricing and, therefore higher profit for you.. Here is how it works:

<p>Level 2 “Preferred” Customer When you purchase at least \$6,000 within a calendar year you will receive the second best, Level 2 pricing on each and every purchase you make no matter how little you buy.* This includes pick-ups, pack & ship or UPS orders (except Glass-UPS).</p>	<p>Level 3 “Advantage” Customer When you purchase at least \$18,000 within a calendar year you will receive our best, Level 3 pricing on each and every purchase you make no matter how little you buy.* This includes pick-ups, pack & ship or UPS orders (except Glass-UPS).</p>	<p>Level 4 “Cost Plus” Customer When you purchase at least \$24,000 within a calendar year you will receive: • Absolute best “last column” price on everything you buy.* • No boxing or pallet charges on truck shipments of \$5,000 or more. • Periodic special pricing available only to “Cost Plus” customers.</p>
--	--	---

We offer an additional 5% discount of level 4 pricing for most intact factory cases of one color or glass type.
We also offer additional discounts for full truckload or container orders. All prices in this catalog are subject to change without notice.

ARCHITECTURAL GLASS

CUT SIZE TO ORDERS

We do "cut to size" orders and will be pleased to quote according to your requirements. Please note that our cutting tolerances are +/- 1/16". We do, however, reserve the right to refuse to cut certain types of glass and/or patterns which may be requested. Where possible, exceptions to "cut to size" have been noted. Please call to inquire.

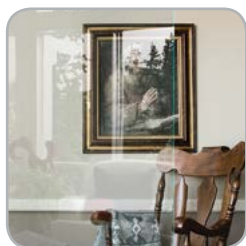

We will not cut to size without a written or faxed purchase order. This is to avoid wrong sizes being cut due to misunderstandings during verbal communications.

CRATING AND PALLET CHARGES

There is a \$40.00 per crate charge on all standard size "re-pack" glass orders. The charge is the same no matter how many or few glass sheets are in the box. We have crates that can hold up to 50 sheets of glass. However, if you have to "man-handle" the case off the truck, let us know the maximum weight per case you prefer. Large sheets are subject to custom crating charges of up to \$150.00 and "Built Up" cases are \$40.00. There are no crating charges for full unopened factory cases.

Glass crates must be secured to a wooden pallet to prevent damage and make loading and unloading easier. There will be an additional \$10.00 charge per standard pallet and \$50.00-\$75.00 per custom pallet. A standard pallet can hold up to 2 glass crates.

KAROUSEL GLASS

DL PGP
Premium Glass Pack

This pack contains 36 pieces 12" x 12" of the most popular colors including Red, Orange, Iridescent and colored textures.

KAROUSEL GLASS

KOKOMO OPALESCENT GLASS

SIZES AND PACKAGING

Sheet Sizes:

Standard sheet - 32" X 32" or 7.1 sq.ft.

Case Contents:

Original cases contain 20 - 24 standard sheets or 185 to 225 sq.ft.

Weights:

Glass alone weighs approximately 1.6 pounds per sq.ft.

KOKOMO DEFINITIONS

Density Codes:

Many of the color codes found on Kokomo glass have a "density" suffix.

No suffix code - Medium (KOG's most common density)

D - Very dense (diffuses light)

MD - Medium dense (limited light transmission)

ML - Medium Light (considerable light transmission)

L - Light (wispy - nearly translucent)

LL - Streaky (Usually a combination of two or more cathedral colors with no opal content)

Texture Codes:

A - Seedy

G - Granite

H - Hammered

F - Flemish

KDR - Light Granite or Moss

WAV - Wavolite

RIP - Ripple

TRIP - Tight Ripple

GCP - Granite Catspaw

SCP - Smooth Catspaw

IR - Iridescent

Kokomo strives to accurately represent their glass in the images we display. Every monitor is different and therefore will depict the glass somewhat differently. The photos are taken of a 2" x 3" swatch of glass and may or may not show the beauty of a larger sheet of glass.

KOG SAMPLES

Sample boxes contain over 200 of the most popular colors and textures including opalescent combinations, streakies, opalumes and patterns.

KOKOMO OPALESCENT GLASS

KOG PONY

Pony Case contains fifty lights of top quality glass, 16" x 18" or 100 sq.ft., packed in a small wood carton. Boxing charge does not apply to the Pony Case.

KOKOMO OPALESCENT GLASS

RESTORATION WINDOW GLASS

Hollander Circa 1900 Window Glass™ Made in the USA

We manufacture this glass right here in the USA. Our Circa 1900 glass has a slight optical wave and can be fabricated in 3,4,5,6 and 10mm thicknesses and in the sheet sizes up to 60X96 inches. It is temperable in 4mm and up.

The Circa 1800 glass version has random pits that suggest seeds, and has a little more surface distortion.

Saint Just is one of the few remaining manufacturers that employs pre-industrial era production techniques to create handmade sheets prized by restorers for their idiosyncratic characteristics that authentically replicate the type of glass made up until the turn of the century.

Sheet sizes are approximately 36x36 inches with thickness ranging from 2 to 3mm. Although not temperable this glass can be laminated for safety glazing purposes. We provide this service to our customers.

With the Colonial antique window glass added to our racks we will once again offer a full line of restorations glass for any budget, ranging from the hand-blown to our own in-house replications.

In addition to Saint Just's mouth-blown glass, we also offer a variety of Schott drawn glass products replicating the style of glass produced after 1910.

The Restover™ line is machine drawn, producing sheets with a consistent thickness between 2.75 and 3mm for easy cutability and comes in large sheet sizes measuring up to 63X83 inches. The Restover™ glass is non-temperable and has a slight optical wave with no reams or seeds.

If your project requires a product similar to Restover that has a greater distortion, we also offer Renova™.

Goethe™ glass is a thicker version of the Restover (4.5 to 5mm) that is temperable and comes in sheets measuring 59X63 to 63X83.

SPECTRUM GLASS

SIZES AND PACKAGING

Sheet Sizes:

The standard sheet (S/S) size is 24" x 48" or 8 sq. ft.

Waterglass sheet size varies from 19" to 22" x 48" or 6.4 to 7.33 sq. ft.

Case Contents:

Original factory cases contain 58 standard sheets or 464 sq. ft.

Waterglass factory cases contain 56 to 60 stock sheets & average 375 sq. ft.

Our re-packed cases contain a maximum of 45 S/S & average 360 sq. ft.

Weights:

Glass alone weighs approximately 1.6 lbs. per sq. ft.

Standard factory case weighs approximately 830 lbs.

Waterglass factory case weighs approximately 650 lbs.

Spectrum Definitions:

T - Glass: Transition or "T" glass is a fully quality product which varies from the standard in color, mix, translucency or texture. It can also be previously standard items that have been discontinued.

Hollander Glass does stock a selection of T-Glass colors at a very attractive price.

Note: It is our policy to make you aware to the "T" selections we have available so you may order them, however, ***we will NEVER substitute T-Glass for standard glass without your approval.***

HOME COLLECTION
SAMPLE SET

Complete set of the current Spectrum Home Collection product line. The extra large (4x5") samples provide a great way to compare all the textures, including available thick (5mm) versions.

SP MASTER

The Master Spectrum Sample Set has been designed for the professional and advanced craftsperson. It puts the entire Stained Glass product line -- nearly 400 samples -- at your fingertips. The Master Set contains every color in every texture we produce.

SP SAMPLES

The Standard Spectrum Sample Set includes every color and color-mix we make, as well as examples of every available texture. The set contains nearly 200 samples, organized with dividers -- the perfect choice for most customer's needs.

UROBOROS GLASS

WISSMACH GLASS

SIZES AND PACKAGING

Sheet Sizes:

The standard stock sheet (S/S) size is 32" X 42" or 9.3 sq. ft.

Full sheets - (F/S) 32" X 84" are available on special order, in full case lots only.

Case Contents:

Standard factory cases contain 50 S/S or 465 sq. ft.

Full Sheet, 32" X 84" cases are available on special order.

Weights:

Glass alone weighs approximately 1.6 lbs. per sq. ft. Standard factory case weighs approximately 760 lbs.

A re-packed case contains 40 S/S & weighs approximately 600 lbs.

WISSMACH DEFINITIONS

Texture Codes:

Prefix codes:

PW S - Seville - Orange Peel Texture

PW A - Aqua-Lite - Resembles soft ripples on water

PW DR - Double Rolled - Almost smooth, no bubbles

Suffix codes:

C - Figure "C" - Large Hammered texture with subtle lines on each hammer welt.

DD - Dew drop

S - Seedy

G - Granite back pattern

H - Hammered back pattern

F - Flemish

FL - Florentine

M - Moss Pattern

R - Ripple Pattern

IR - Iridescent

Density Codes:

Many of the color codes found on Wissmach glass have a "density" suffix. The following chart out-lines the density codes which apply to the corresponding opalescent color code.

No suffix code - Dense (most common "pearl" opal density).

MD - Medium dense (limited light transmission)

ML - Medium light (considerable light transmission)

L - Light (nearly translucent).

LL - Streaky. This usually indicated that the glass is a combination of two or more cathedral colors with no opal content.

PWO - This prefix code indicates a Wispy Opalescent.

WE STOCK ONLY THESE GLASSES LISTED, ALL OTHER WISSMACH GLASS PRODUCTS ARE AVAILABLE ON A "DROP SHIPMENT" BASIS ONLY FROM THE FACTORY.

MISCELLANEOUS GLASS

Sheet size:

Standard sheet (S/S) - approximately 33" x 27" or 6.87 sq.ft.

Glass Art Glass Plated owes its peculiarity to the thin layer of colored enamel melt deposited on a blown clear or colored glass.

Limited availability similar to Schott's antique glass.

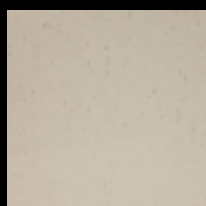

Sizes and Packaging:

FNA - (S/S) - 30" x 40" approx. (sheets may vary)

Case Contents:

approx. sizes only (each case varies)

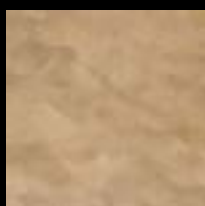

FNA : original cases contain 30 S/S or 320 sq.ft.

Size : 55.1" x 63" approximately

GL 706

5.5-6mm/ 7/32"-1/4" +or- .50

Size: 55.1" x 63" approximately

In addition to even light distribution, using Flashed Opal glass offers you a host of other benefits:

Low Void Height

The void height required to ensure an evenly lit illuminated ceiling with Flashed Opal is very low.

Color Neutral

Flashed Opal is based on a colorless optical special glass and the white flashed opal glass layer is practically white. As a result there is no adverse effect on the luminous color of the light source.

Scratch-Resistant

Flashed Opal has a high resistance to scratching and is therefore impervious to surface damage.

Non-Deforming

Flashed Opal always retains its shape, independent of the type of lamp used.

The cross section pictured above shows the white opaque layer fused to the bottom of the glass (the opaque side being closest to the light source).

MISCELLANEOUS GLASS

Most of the colors in this series are from Vegla's Sahara glass selection. This imported glass is glue chipped here in the U.S. and has a consistent standard fern pattern.

Sizes and Packaging:

Stock sheets (S/S) - 33" X 41" or 9.4 sq.ft

Case Contents:

Original intact case contains 50 S/S or 470 sq.ft.

ACID ETCHED GLASS

COLORED NIAGRA

MISCELLANEOUS GLASS

These two glass lines are no longer being manufactured by the factory, however we have multiple cases in stock of each color available for immediate shipping.

Niagra (C89 Cathedrals):

The best way to describe this texture is "like rain water running down a window". The subtle linear texture of this glass is most unique.

Sheet Sizes:

The "factory sheet" (F/S) size varies from one texture variety to another but all are quite large as shipped by the factory. We cut these sheets down to a more manageable "stock sheet" (S/S) size for your convenience.

C89 - F/S - 41" x 65", S/S - 32" x 41"

Case Contents:

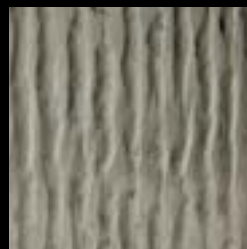

C89 - Original cases contain 46 F/S or 772 sq. ft.

C89 121
Light Blue

C89 404
Light Violet

Sahara (C80 Cathedrals):

As the name suggests, the texture of this glass resembles dry windblown sand. It is an old world texture with a random pattern that serves both to diffuse transmitted light and obscure visibility.

Wave-X (CW Cathedrals):

The soft texture of Wave-X can be compared to light ripples on the surface of a calm lake. It has brilliant crystal luster.

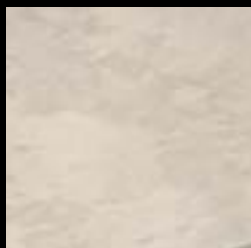

Sheet Sizes:

**C80 & CW - F/S - 41" x 65",
S/S - 32" x 41"**

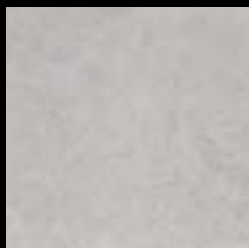

Case Contents:

C80 & CW - Original cases contain 46 F/S or 640 sq. ft.
